

REMARKS

Claims 2 – 6 are pending in the above-identified patent application. Claims 1, 3, and 4 were rejected in the Office Action dated July 1, 2004. Claim 1 is being canceled. Claims 2 – 4 are being amended. Claims 5 and 6 are being added. Reconsideration is respectfully requested.

Acknowledgement of Priority Claim

Applicant respectfully requests acknowledgement of the priority claim to Korean patent application no. 10-2003-0089663 filed December 10, 2003 as indicated in the preliminary amendment of February 24, 2004.

Objection to the Drawings

The Examiner objected to the drawings as they should be designated with a legend such as --Prior Art--. In response, Applicant is amending the drawings accordingly and requests withdrawal of the objection.

Objection to the Specification

The Examiner objection the Abstract for the use of the phrase “disclosed herein.” In response, Applicant amending the Abstract to remove this phrase and therefore requests withdrawal of the objection.

Claim Objections

The Examiner object to claim 1 because of a typographical error; specifically, “at least of air guide.” Claim 1 is being cancelled and the limitations of claim 1 are being incorporated into claim 2. The limitation “at least of air guide” is being changed to “at least one air guide.” Accordingly, Applicant requests withdrawal of this objection.

Claim Rejections – 35 U.S.C. §112

The Examiner objected to claim 4 under 35 U.S.C. §112 as not described in the specification in such a way to reasonably convey to one skilled in the relevant art that the inventor, at the time of application was filed, had possession of the claimed invention.

Specifically, the claim limitation “the air guide is reduced downward in width and height” is not adequately described in the specification. In response, Applicant is amending this claim to clarify a lower air guide is smaller in width and height than an upper air guide. This limitation is clearly shown in FIG. 7 and in the corresponding text of the specification (e.g., page 11, lines 4 – 12). Accordingly, Applicant requests withdrawal of the objection.

Claim Rejections – 35 U.S.C. §102

The Examiner rejected claims 1 and 3 under 35 U.S.C. §102(b) as being anticipated by U.S. Patent No. 4,853,162 to Liu. Further, the Examiner objected to claim 2 as depending from a rejected base claim but would be allowable if rewritten in independent form with the limitation of the base claim and any intervening claims. Accordingly, Applicant is canceling claim 1 and incorporating its limitations into claim 2. Claim 3 and 4 are being amended to depend from or through to claim 2, which is allowable, as indicated by the Examiner. Accordingly, as claims 2 – 4 are allowable and claim 1 is cancelled, Applicant requests withdrawal of this rejection.

Allowed Claims

The Examiner objected to claim 2 as being dependent upon a rejected base claim but would be allowable if rewritten in independent form including all limitation of the base claim and any intervening claims. Accordingly, Applicant is rewriting claim 2 as suggested by the Examiner and requests withdrawal of the objection.

The Examiner further indicated that claim 4 is allowable. Accordingly, Applicant is adding new claim 6, which incorporates the limitations of claims 1, 3, and 4.

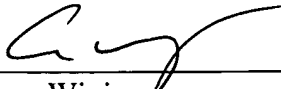

New Claims

Applicant is adding new claims 5 and 6. Support for claim 5 is found at least at the last paragraph of page 10 and in FIG. 6. Claim 6 is being added for the reasons stated above. No new matter is being added.

As only allowable claims remain pending, Applicant respectfully requests that a timely Notice of Allowance be issued in this case.

Respectfully submitted,
Jae Byeong GU
